JUMANJI XR

Jumanji XR is an inmersive virtual reality board game where players explore a jungle, roll dice, move across a dangerous path, and overcome unexpected challenges to reach the final temple.

Team members: Salvador Martínez, Javier Martín

Description

(1) Why this app?

The purpose of Jumanji XR is to transform the tradicional board game experience into an inmersive virtual reality adventure. It aims to make board games more engaging by allowing players to interact with a three-dimensional jungle environment instead of playing on a conventional flat board

(2) **How will this app achieve its goal?**

The application will be developed in Unity for Meta Quest 2. Players will interact with a virtual board, roll a dice, move a character token, and encounter special spaces containing traps or treasures. Hand tracking will be used to make interactions feel natural and intuitive. The main objective is to reach the final temple while completing the adventure.

(3) **What makes it different from other solutions?**

Unlike a traditional board game, Jumanji XR combines tabletop game mechanics with an immersive three-dimensional jungle environment. The board will feature visual events, environmental details, and interactive rewards that make each move feel like part of an adventure.

Main Features

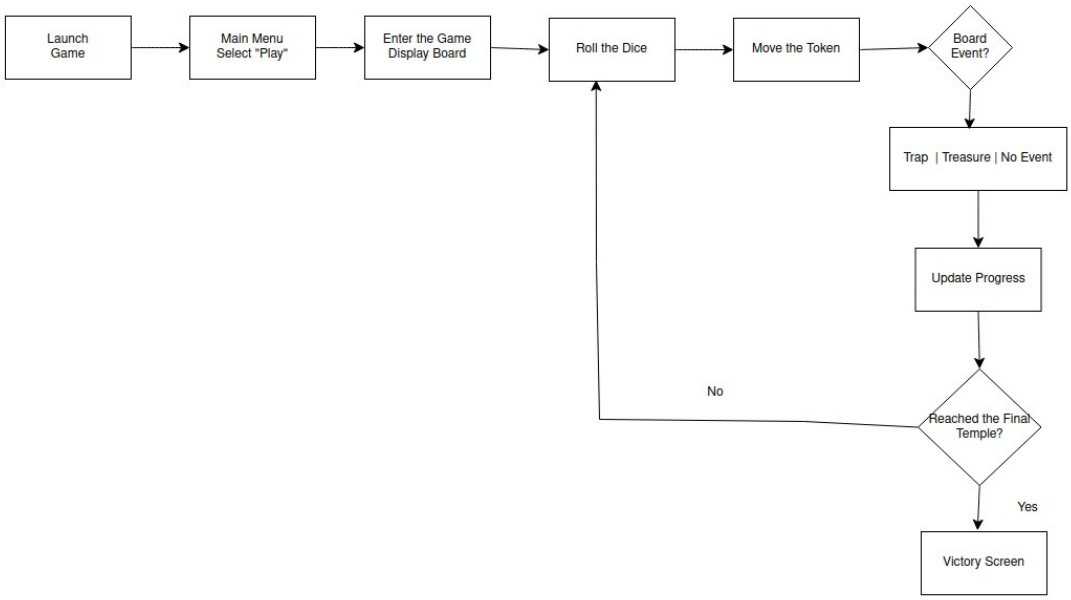

PRINCIPAL MAIN VERY IMPORTANT FEATURE:

Immersive VR Board Game: A single-player virtual reality adventure in which the player rolls a dice, moves a character token along a jungle board, and tries to reach the final temple while encountering different challenges.

Other features:

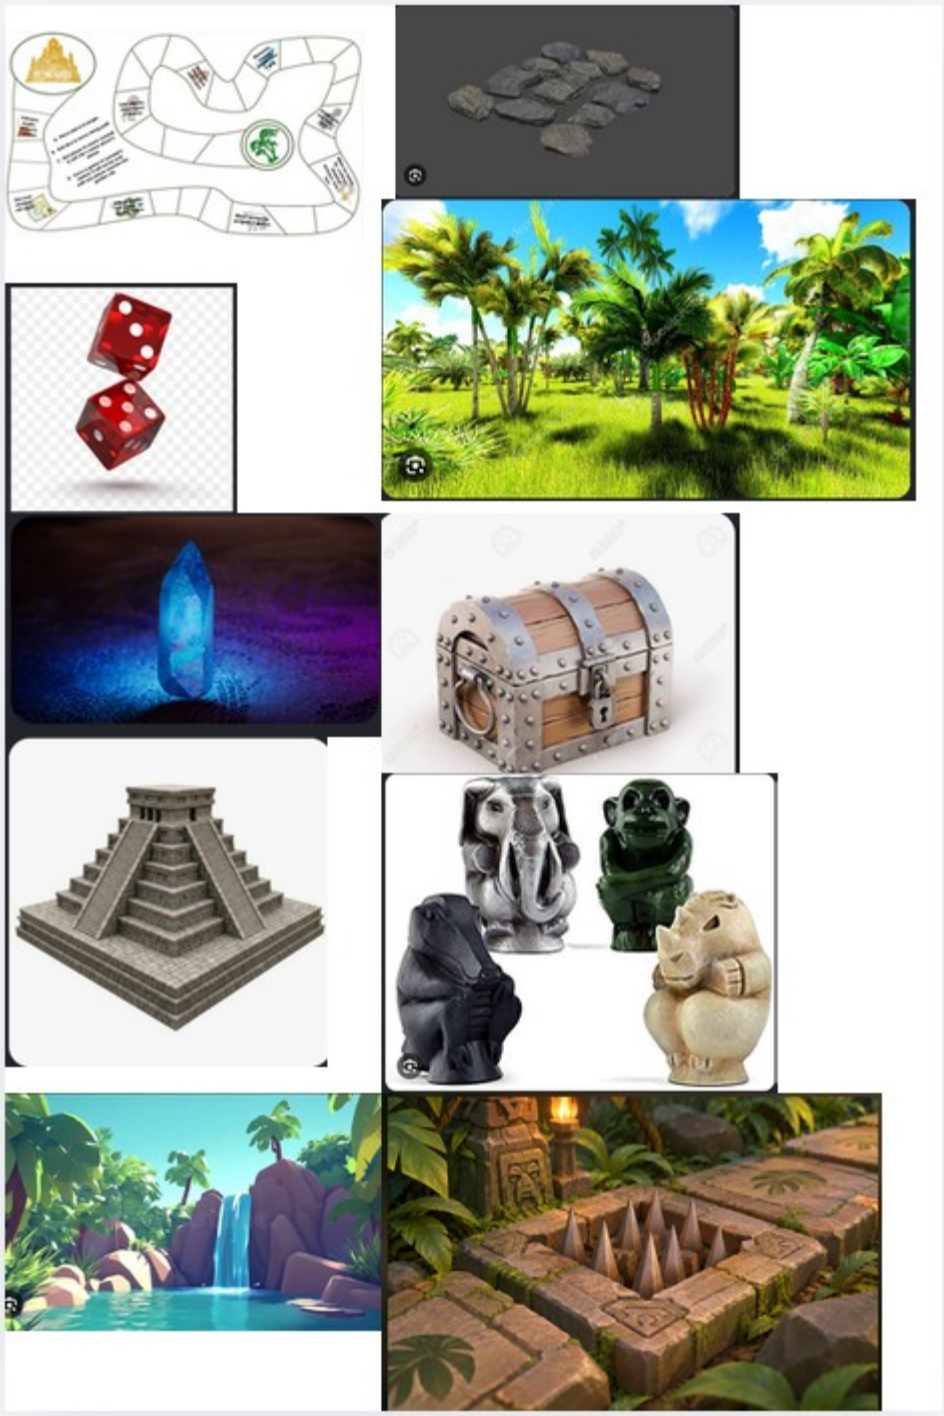

- **Random Events:** Special board spaces trigger events, such as jungle traps, obstacles, or unexpected challenges.
- **Hand Tracking Interaction:** The player can interact with virtual objects, such as the dice and game pieces, using hand tracking.
- **Treasure Collection:** The player can discover and collect crystals or treasures while progressing through the board.
- **Progress and Win System:** The game tracks the player's position and collected treasures and displays a victory screen when the player reaches the final temple.
- **Jungle Environment:** A 3D environment featuring stone paths, vegetation, a river, and an ancient temple to create an adventurous atmosphere.
